https://www. udemy.com/ certificate/U C-b87795a7-8ea5-4512-808ac8cdb37260a I am seeking a challenging role as a Senior Java Developer where I can leverage my extensive 4 years of experience in Java, Spring Boot and AWS to develop innovative and scalable software solutions.

(November 06, 2019

- January 29, 2022)

(July 04, 2022 -

July 07, 2023)

### **WORK EXPERIENCE**

Lenskart **Solutions Private** Limited

SDE 1

I was entrusted with the responsibility of developing microservices modules and REST APIs tailored to specific business requirements, showcasing my proficiency in backend development and understanding of business needs.

https://www.lenskart.com/

Scalong(Ibosstech Solutions pvt ltd)

Senior Java Developer

I led key projects including the design of claims microservices and migration of a monolithic application to microservices using AWS. As a team leader, I facilitated REST endpoint creation and demonstrated multiple POCs to the team and client.

 $_{\scriptsize{\scriptsize{\scriptsize{\tiny{\tiny{CD}}}}}}$  https://www.ibosstechsolutions. com/

Boutiquat.pvt(January 29, 2022 - July 07, .ltd

SDE1

In my role, I migrated a Catalog Project from Magento to Java Microservices, developed custom microservices, integrated Datadog into AWS for enhanced monitoring, and created event-based services, thus expanding my software development expertise.

2020 - July 29,

**PROJECTS** 

**Automation of** orders synchronization

Orders syncing in Unicommerce

(December 29, 2019 - April 29, 2020)

to access particular panel Internal System Manager Tool

**Authentication of Users** 

"This project is to reduce the DB calls on server while user authentication, as huge. number of different teams using management tool for their daily tasks. This project is to reduce the DB calls on server while user authentication."

"This is a major project of lenskart in which orders placed at web end needs to be synchronize in third party inventory manager Unicommerce with all the necessary information of orders and products. Implemented schedulers to make the process faster and event based that ultimately. reduces the making and delivery time. Implemented Apache Kafka for sending all the orders info to Unicom."

(February **Catalog Project** 28, 2022 -Migration June 29, Migration Of Catalog 2022)

Project from Magento platform to lava Microservices.

> "Develop Microservices as per the needs in Java (KSA project). Integrate Datadog in all services in AWS or monitoring and tracing. Develop event-based services."

**Claims Application** Create, design and

Document claims microservices.

(September 29, 2022 - July 28, 2023)

"Migration of monolith claims application to microservices and deployed in aws. Use multiple AWS services(ECS, S3, SQS, Rekognition, Lambda, SES) Lead a team of 3 junior developers to create multiple rest endpoints. Developed multiple POC's and demonstrate to the team and client"

Claim Fraud Detector

(June 29, 2023 - July By using AWS Sagemaker 29, 2023) developing fraud detector to find the fraud claims.

Created POC's for detecting fraud in image submission.
